Projects

LIFE SAVER | AUG 2022 – FEB 2023

Life Saver is a web and Android application focused on organ and blood donation services. It helps users donate and receive blood, organize blood campaigns, and locate nearby blood banks with real-time stock updates. The app also facilitates organ donation and will soon integrate a fundraising module to assist those in need of medical treatment. The platform supports both light and dark themes, secure password storage using MD5 hashing, and protection against SQL Injection.

· **Technologies Used:**
  Front-End: HTML, CSS, JavaScript, XML
  Back-End: Java, PHP, Firebase

LIFE SAVER | AUG 2022 – FEB 2023

Traveling-Site is an online travel platform built with PHP, where users can explore various travel destinations. The website allows users to view detailed information about places, including descriptions, images, ratings, and reviews. Admins can manage destinations by adding, editing, or deleting listings, and control contact page information. The site gives admins full control over content and overall site management.

· **Technologies Used:**
  Front-End: HTML, CSS, JavaScript
  Back-End: PHP, MySQL
